

MOHAMED YASIN K

SOC Analyst L1 | Security Operations | Threat Detection & Incident Response
Tiruchirappalli, India | mohamed.yasin.sec@gmail.com | +91 78678 37624 | [linkedin.com/in/mohamedyasin-k](https://www.linkedin.com/in/mohamedyasin-k)

EXECUTIVE SUMMARY

B.Sc. IT (Cybersecurity) graduate with hands-on capability in security monitoring, log analysis, alert triage, false positive analysis, and incident escalation. Ranked Top 3% globally on TryHackMe with 100+ rooms completed spanning SOC operations, threat hunting, and phishing investigation. Mapped threats to MITRE ATT&CK, classified severity via CVE/CVSS scoring, and executed incident triage in simulated SOC environments. Achieved top national placements in CTF competitions applying adversarial attack and detection techniques. Operationally ready to monitor alerts, correlate logs, and escalate validated incidents within a SOC L1 function.

EDUCATION

B.Sc. Information Technology — Cybersecurity Specialisation 2023 – 2026
Jamal Mohamed College, Tiruchirappalli | Bharathidasan University | CGPA: 7.8 / 10

CERTIFICATIONS

- **CompTIA Security+ (SY0-701)** — In Progress, Expected May 2026 | Threats & Attacks, Network Security, Incident Response, IAM, Cryptography
- **TryHackMe — Jr Penetration Tester & SOC Level 1** | Both paths completed | Top 3% Global Ranking | 100+ rooms
- **LetsDefend — SOC Analyst Path** | Incident Triage, False Positive Analysis, Alert Investigation, Malware Analysis & SIEM Operations (log correlation, alert prioritization) in live SOC simulation

TECHNICAL SKILLS

- **Defensive / SOC:** Incident Response, Log Analysis (Windows Event Logs, Syslog, Firewall Logs, Proxy Logs), Security Monitoring, Alert Triage, False Positive Analysis, Incident Escalation Workflows, Runbook & Playbook Execution, CVE/CVSS Scoring
- **SIEM & SOC Tooling:** Splunk (lab exposure — SPL queries, log correlation), ELK Stack (basic), Wireshark, VirusTotal, AbuseIPDB, Threat Intelligence Triage
- **Frameworks:** MITRE ATT&CK (TTP mapping), NIST Cybersecurity Framework, OWASP Top 10
- **Network & Protocol Analysis:** TCP/IP, DNS, HTTP/HTTPS, OSI Model, IDS/IPS Concepts, Firewall Fundamentals, Packet Analysis
- **Security Tools:** Burp Suite, Nmap, Metasploit, Gobuster, ffuf, Netcat, Hydra, Hashcat
- **Scripting & Automation:** Python (security automation), Bash
- **Operating Systems:** Kali Linux, Ubuntu, Parrot OS, Windows 10/11, Active Directory environments (HTB labs)

PROJECTS

Web-Based Active Reconnaissance Tool | Python, FastAPI | web-ui-recon-active.vercel.app | [GitHub](#)

- Engineered and deployed a live recon automation tool executing technology fingerprinting, host extraction, open port detection, and robots.txt discovery from a single URL input — reducing manual enumeration time by ~85%.
- Designed a modular FastAPI backend enabling rapid integration of future CVE and vulnerability scanning extensions, demonstrating security tooling capability aligned with SOC automation and detection engineering workflows.

CTF COMPETITIONS & RANKINGS

- **Innothan CTF** — Top 3 | Inter-College | Web & Network Exploitation
- **ROOTW4R CTF** — Top 6 | Inter-College | Jeopardy style
- **CYBERTRON CTF** — Top 10 | National
- **YUKTHI 2.0 CTF** — Top 20 | National | Tamil Nadu Police & Selfmade Ninja Academy
- **HackQuest 2K25 & 2K26** — Top 20 | National | Web Exploitation

PRACTICAL TRAINING & PLATFORMS

- **LetsDefend — Live SOC Simulation:** Triageed real-world alerts, performed false positive analysis, investigated malware incidents, and executed log correlation workflows in a simulated enterprise SOC environment with realistic ticketing queues.
- **TryHackMe — SOC Level 1 Path:** Completed log analysis (Windows/Event Logs), SIEM alert triage, phishing investigation, threat hunting, and incident escalation workflows — directly mapped to L1 SOC responsibilities.
- **HackTheBox:** Independently rooted machines covering Active Directory enumeration, Kerberoasting, ADCS exploitation, and memory forensics; authored structured vulnerability reports per engagement.
- **PortSwigger Web Security Academy:** Completed all OWASP Top 10 labs validating both exploitation technique and defensive mitigation knowledge for SQLi, XSS, IDOR, SSRF, and XXE.
